Empowering Scientists
Enabling Innovation

COURSE OBJECTIVES:

Participants will understand the key requirements of ISO/IEC 17025, including technical and management system elements. They will learn how to implement the standard in testing and calibration labs, ensure compliance, improve quality systems, and prepare for accreditation.

KEY TOPICS COVERED:

1. Introduction to ISO/IEC 17025
2. Structure of the Standard
3. Impartiality and Confidentiality
4. Organizational Roles and Responsibilities
5. Resource and Process Requirements
6. Management System Requirements
7. Corrective Actions and Continuous Improvement
8. Accreditation Process
9. Application in Testing and Calibration Laboratories

LEARNING OUTCOMES:

- Understand ISO/IEC 17025 requirements.
- Apply the standard in lab operations.
- Ensure impartiality and confidentiality.
- Manage lab resources and systems.
- Address nonconformities effectively.
- Drive continuous improvement.
- Prepare for accreditation.
